

SBC Prime Projects

MUSCAT INTERNATIONAL AIRPORT

Main Building: 1,48,600 Sq/ft
Service Building: 1,11,300 Sq/ft
Location: OMAN

About

The project's scope of work consists of a in-flight catering facility at Muscat International Airport, Muscat, Oman. The project includes a massive building to accommodate kitchen equipment for serving several carriers flying to Muscat, including the national airline Oman Air. The project will have the capacity of 24,000 meals per day. It will have dedicated areas for product deliveries, storage, food preparation, dish washing, and garbage treatment and evacuation.

SCOPE OF WORK

- Detailed 3D modelling of MEP, Architecture and Structure.
- Resolving the clashes
Between services and
Between architectural &
Structural trades
- Coordination Meetings
